BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ **BLACK BORDERS**
- ☐ **IMAGE CUT OFF AT TOP, BOTTOM OR SIDES**
- ☐ **FADED TEXT OR DRAWING**
- ☐ **BLURRED OR ILLEGIBLE TEXT OR DRAWING**
- ☐ **SKEWED/SLANTED IMAGES**
- ☐ **COLOR OR BLACK AND WHITE PHOTOGRAPHS**
- ☐ **GRAY SCALE DOCUMENTS**
- ☐ **LINES OR MARKS ON ORIGINAL DOCUMENT**
- ☐ **REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY**
- ☐ **OTHER:** _____

IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.

Appln. No. 10/810,187
Preliminary Amendment dated
August 18, 2004

Amendments to the Claims:

Please amend claim 5 (the unnumbered paragraph between claims 4 and 6 beginning at line 1 on page 44 of the present application) as follows. The following listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claim 1 (Original). A display processing device comprising:
a storage means for storing an image file;
a display means for displaying an image based on said image stored in said storage means; and
5 a display control means for controlling the display of said image based on the image display control information included in an image file corresponding to the image displayed on said display means.

Claim 2 (Original). The display processing device according to claim 1, wherein said image display control information is inserted into the text description area included in said image file.

Appln. No. 10/810,187
Preliminary Amendment dated
August 18, 2004

Claim 3 (Original). The display processing device according to claim 1, wherein said image display control information includes information to designate a display control method of said image and the parameters used for the display control processing, and said display control means controls the display of the image based on said parameters.

Claim 4 (Original). The display processing device according to claim 3, wherein said display control method includes a display control method to scroll said image, and the parameters express the display speed in the scrolling display.

Claim 5 (Currently Amended). The display processing device according to claim 3, wherein the display control method includes a display control method to scroll said image, and the parameters express at least the coordinates for starting said scrolling display.

Claim 6 (Original). The display processing device according to claim 3, wherein said display control method includes a display control method to display said image by enlarging or reducing said image, and said parameters express the

Appln. No. 10/810,187
Preliminary Amendment dated
August 18, 2004

- 5 coordinates for performing enlarged or reduced display in said image.

Claim 7 (Original). The display processing device according to claim 1, wherein said image display control information includes positional information, and further comprises;

- 5 a positional information acquisition means for acquiring the positional information of the actual location;
a map information storage means for storing a range of map information including at least the positional information included in said image display information and the positional
10 information of said actual location;

- wherein said display control means displays said map information on said display means with display control contents based on the positional information included in said image display information and the positional information of said actual
15 location.

Claim 8 (Original). The display processing device according to claim 7, further comprises;

Appln. No. 10/810,187
Preliminary Amendment dated
August 18, 2004

a positional information transmitting means for
transmitting the positional information included in said image
5 display control information and the position information acquired
by said positional information acquisition means to a map
information database of an exterior device;

a map information receiving means for receiving said map
information replies from said map information database which
10 receives the positional information included in said image
display control information transmitted by said positional
information transmitting means and the positional information
acquired by said positional information acquisition means;

wherein said map information storage means stores the map
15 information received by said map information receiving means.

Claim 9 (Original). The display processing device
according to claim 8, wherein said map information database is
established on a communications network connected through a
wireless communications network, further comprises:

5 a wireless communications means for communicating with said
wireless communications network;

wherein at least any said positional information
transmitting means and said map information receiving means

Appln. No. 10/810,187
Preliminary Amendment dated
August 18, 2004

transmits or receives information through said wireless
10 communications means.

Claim 10 (Original). The display processing device
according to claim 1, further comprises:

an image input means;

an image display control information input means for
5 inputting said image display control information; and

an image file generation means for generating an image file
including the image inputted by said image input means and the
image display control information inputted by said image display
information input means.

Claim 11 (Original). The display processing device
according to claim 10, wherein said image input means includes an
image pick-up means.

Claim 12 (Original). A display control method for
displaying an image based on an image file stored in memory
according to the image display control information described in
the text description area of the image file.

Appln. No. 10/810,187
Preliminary Amendment dated
August 18, 2004

Claim 13 (Original). The display control method according to claim 12, wherein said image display control information includes information for specifying the display control method of said image and the parameters used for the display control
5 processing; and

said image is displayed based on said image file according to said display control method and said parameters.

Claim 14 (Original). The display control method according to claim 13, wherein said display control processing includes a process which shows said image by the display scrolling, and said parameters express the display speed of said display scrolling.

Claim 15 (Original). The display control method according to claim 13, wherein said display control processing includes a process which shows said image by the display scrolling, and said parameters express at least coordinate information indicating the
5 starting position of said display scrolling.

Claim 16 (Original). The display control method according to claim 13, wherein said display control processing includes a process which performs enlarged or reduced display of said image,

Appln. No. 10/810,187
Preliminary Amendment dated
August 18, 2004

and said parameters express coordinate area information in which
5 to perform an enlarged or a reduced display of said image.

Claim 17 (Original). The display control method comprises
the steps of:

a directional step for directing the display of an image
based on an image file;

5 an extraction step for extracting the image display control
information included in the image file when display of the image
is directed in said directional step; and

a control step for controlling the display of said image
based on the image display control information extracted in said
10 extraction step.

Claim 18 (Original). A display processing program for
making a computer execute comprising the steps of:

a directional step for directing the display of an image
based on an image file;

5 an extraction step for extracting the image display control
information included in the image file when display of the image
is directed in said directional step; and

Appln. No. 10/810,187
Preliminary Amendment dated
August 18, 2004

a control step for controlling the display of said image
based on the image display control information extracted in said
10 extraction step.
